

ATHENS WALL TORCH

Product Features

This modern decorative torch provides a wall mounted unit for interior and exterior use. Mounted tight to the wall this unit provides an impressive wall mounted luminaire with a defused light output.

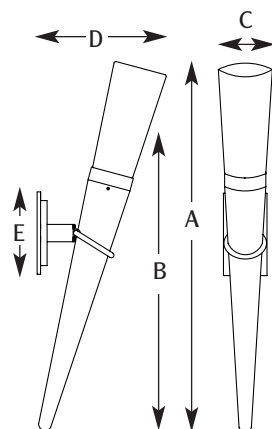

Features

The Athens with its wall mounting plate, with four fixings, is manufactured from die cast aluminium providing a durable product. The product is manufacture to European standards EN60598 for compliance. The glass diffuser is secured with stainless steel screws and sealed with silicone gaskets for a high ingress protection.

Control Gear

The unit is provided with an E27 lampholder positioned for a Par lamp but the lampholder can also be positioned for modern compact fluorescent lamps with integral gear providing a range of lamp wattages and lamp colour temperatures.

With modern high output compact fluorescent lamps a lamp RA of 82 can be achieved in a number of warm or cold lamp temperatures providing a range of illumination effects.
