

HOUSTON WALL TORCH

Product Features

This stylish wall mounted torch offers an indirect method of illumination that is glare free by reflecting the light from the lamp, situated within the die cast aluminium body, and using the reflective dish as a reflector so providing a defused distribution.

Features

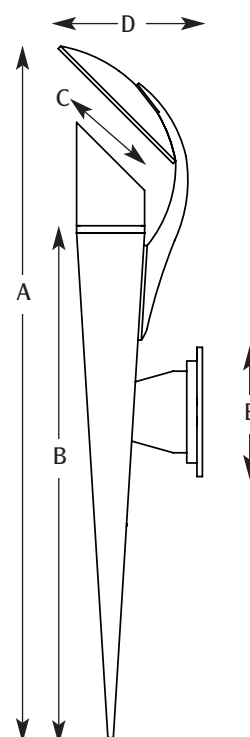

The circular mounting plate and cast transition to the torch body result in giving this luminaire a short out-reach from the wall, which can be an advantage in narrow locations. The die cast aluminium body is treated and powder coated for a durable finish. The luminaire is class 1 and is produced in accordance with EN 60598 regulations for compliance. The lamp is protected with a glass cover which is sealed with silicone gaskets.

Control Gear

The torch is designed for a PAR 20 lamp or LED, univalent is preferred, and is supplied with an E27 lampholder.
