

BACK LAMPS

Windsor

The Windsor back lamp is designed to match the Windsor range of lanterns, please see relevant data sheets. This matching wall mounted lantern is ideal for narrow footpaths or entrance illumination. The ogee, cap and spike is used to vent the burner configurations see table below.

Typical Specification

Windsor IP54 back lamp: handcrafted copper frame. Glazing: full **glass** glazed lantern frame with a **hinged door**. The Windsor back lamp measures 650mm in height and 306mm wide with a projection of 230mm. Fitted with a **double inverted cluster mantle** with a **permanent pilot**. Finished **polished and lacquered** with a eggshell back and top reflector.

Please note that items highlighted in bold can be changed using the options available.

Product Features

Sugg back lamps originated over 100 years ago to light narrow passageways and porticos of Victorian London. All the back lamps are designed for ease of installation, having a separately mounted back-plate for service connections on which the lantern body is fitted. The back lamps are manufactured from copper to ensure durability.

Controls

Services are connected to the back-plate which fixes to the wall, the lantern body then fits over this to ensure ease of connection and maintenance. Suitable for both natural and LPG gases

Variations

Finish variations

Natural polished copper; that will age in the environment to a deep natural patina. Polished and lacquered copper, black and other RAL colours can be accommodated but this may be subject to quantity, and prices may differ.

Lantern construction

These IP54 lanterns are manufactured from copper, all soldered construction. Gas back lamps must have a door for ease of access for maintenance and cleaning. We recommend glass glazing as this will perform better thermally and provides a superior appearance.

BACK LAMPS

Victoria

The Victoria is an authentic passage lantern from the last century, which comes complete with a decorative frieze, chimney and back-plate which has a decorative polished disc for improved performance. The picture shows the lantern complete with a twin fishtail burner assembly.

Typical Specification

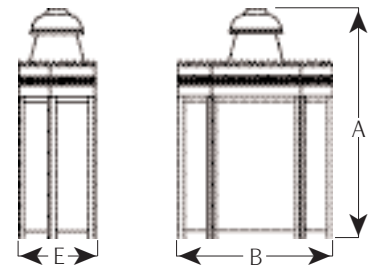

The Victoria IP54 back lamp: handcrafted copper frame. Glazing: full **glass** glazed lantern frame with hinged door. The Victoria back lamp measures 502mm in height and 323mm wide with a projection of 232mm. Fitted with a **twin fishtail burner**, with solenoid and pilot. Finished in **polished** copper that will deepen to a natural patina with age, back and top reflector painted in eggshell.

Please note that items highlighted in bold can be changed using the options available.

Palace

The Palace back lamp has a castellated detail on the top of the decorative frieze. The chimney is fitted as standard, the glazed side panels ensure maximum light output from the twin fishtail burner assembly, as illustrated. The back plate and internal ceiling is powder coated in eggshell with a reflector disc. Also available in brass.

Typical Specification

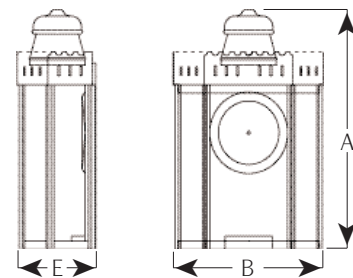

The Palace IP54 back lamp: handcrafted copper frame. Glazing: full **glass** glazed lantern frame with a hinged door. The Palace back lamp measures 457mm in height and 321mm wide with a projection of 159mm. Fitted with a **twin fishtail burner**, **control solenoid** and pilot. Finished **painted Black** with an eggshell back-plate and top reflector.

Please note that items highlighted in bold can be changed using the options available.

Princess

The Princess back lamp has a castellated decoration on the top of the lantern body with a slotted detail in the frieze and a chimney which is fitted as standard. The five glazed panels ensure that the maximum light output is achieved. The Princess offers a smaller lantern than the Palace but common design features are included. Also available in brass.

Typical Specification

The Princess IP54 back lamp: handcrafted copper frame. Glazing: full **glass** glazed lantern frame. The Princess back lamp measures 375mm in height and 229mm wide with a projection of 114mm. Fitted with a **single inverted mantle**, complete with a solenoid and pilot, **painted in black** with an eggshell back and top reflector with a polished disc.
