

Product Features

The Southwark is a traditional, eight panelled, copper lantern and is based on similar, original, lanterns located around the Tower of London. The lantern is hand crafted from copper with an access door for relamping and the gear integrally housed within the lid.

Features

The Southwark is a robust lantern as the frame structure is strengthened with stainless steel inserts. The lantern is available with a door or a hinged lid for relamping. The lantern is frog mounted as standard; designed to fit a 76mm spigot.

Control Gear

All gear is class I wired and a full range of discharge gear can be accommodated integrally within the lantern. The Sugg twin beam optic can be fitted offering superior lighting performance; this lantern will also take a glass refractor. Single and two part electronic photocells are available as standard and should be factory fitted to maintain IP integrity.

Options

Mounting Options

Frog mounted, galvanised steel, powder coated, black polyester for 76mm and 89mm shafts. The frog is also suitable for wall or column bracket mounting and a cradle, and frame suspension are available.
